BEAVER LAKE, SASK.
J. ROTHPLETZ, MANAGER

BREEDERS OF
MINK
FOX
FISHER
FITCH

POST OFFICE ADDRESS
FLIN FLON, MAN. 1912

Dear Sir,

I guess you have found up
all holes of our hearing from me but see I am
at least. When and how making it and did
you enter into the city state of matrimony?
We have been extremely busy. But we got free
and had every thing ready in time
By the time all the minks have mated also the
foxes. The minks are a plant class but all
dark and well furnished we have only one which
could not be cleaned as who dark and that is
the dark from hole.
Dr Cameron's Belars are far better than I expected.
We got a beautiful female cross for forty and
he quit his yapping at night.
Then we got a show white pair of Arctic whites
which I believe mated last week, they are mated
saw the last fall at Church Hill and were brought
to the pen by a prospector.
This kind ran short of foodstuffs and made me
so I offered him \$200 and set them.
We have about 40 total. The German embryos
are wonderful, the Scotch no well but the
Albino's are good.
That Swedish farm shipped a pair of Cameron mink
fur so than 2 minks long.
We also got Cameron from Ryle's which are all
We invite inspection of the ranch and enquiries

2

that he cleaned and also several St German.
Last week we bought the Grand Champion pair of
the last mink's Crystal Palace then from Ryle's
who had imported them.
The mink weighs 8 lbs and the female 5 1/2.
Well this is about all the news about the fur
we are getting lots of meat and poultry has
poked up.
News for the big news, today had a boy and
traded 6th and he are doing fine.
I met in the St. Paul Hotel and she is in Boston
Mary Emery has in with us has the furniture as
a coat and puts up a splendid meal.
He started a group of claims last week. The one
are Jolly, Randers, Don, Harry, myself and
I sharing the larger 18 claims in all and in
line with the Amick property.
The Syndicate has difficulty in raising money and
is negotiating with both the Flint Gordon and
Van Hornes who will probably buy in that case
there will be big things on Beaver Lake.
Some time Ron send us the regulations of those
snaps today is very anxious to have them and
so soon as I get my snaps from the developing firm
I'll send you some traps of the fur.
Hoping every thing goes well with you

Yours truly

Flin
